

Feeding a Brighter Future

with ISS
& Coolfood

At ISS, we believe in a fresh approach to food experiences and we're constantly innovating with impactful initiatives. This is why we're reshaping the way that we serve school food and are committed to planet-conscious actions that will help your children contribute to a more sustainable future.

FOR DELICIOUS CLIMATE ACTION

**SMALL CHANGE
BIG IMPACT**

Coolfood - making climate action simple and delicious

In partnership with World Resources Institute we are focusing on reducing the climate impact of the food we serve in our schools by shifting towards more plant-rich foods on our menus. This shift will help us to put sustainable dining at the heart of our offer and also help to reduce pressure on the climate.

Why Coolfood?

Food production is a significant contributor to climate change, accounting for up to one-third of global greenhouse gas (GHG) emissions.

Some foods generate more greenhouse gas emissions than others. Food that comes from animals make up two-thirds of all agricultural GHG emissions and use more than three-quarters of agricultural land. Plant-based foods generally have a much lower environmental impact!

Did you know..?

Producing beef uses 20 times the land and emits 20 times the greenhouse gases as producing beans, per gram of protein.

The Coolfood Pledge

We have committed to achieving a science-based target to reduce the climate impact of the food we serve. Look out for the Coolfood icon on your new menus.
